Design Your Own Acopian Power System Online!

Easton, PA – November 10, 2006 - Acopian Power Supplies allows you to 'design' your own multiple output Power System by simply using their online [System Builder](http://systembuilder.acopian.com/powersys.aspx) <http://systembuilder.acopian.com/powersys.aspx> (or call Acopian) and specify the output voltages and currents and any operating features that you require.

Acopian production expertise assures that each system will be completely wired, tested and shipped within 9 days after receipt of your order. (If you require non-stocked components, such as special connectors or circuit breakers, more than 9 days may be required.)

Extremely User Friendly!

Shipped within 9 Days

5-Year Warranty

Ordering an Acopian Power System Online is this easy:

- Go to our Online System Builder <http://systembuilder.acopian.com/powersys.aspx>
- List the DC output ratings you require, or select the Acopian power supplies that you wish to be included.
- Determine if any size restrictions are necessary. Assemblies of unusual size or shape (other than 19" wide, or more than 7" high) may require more than 9 days.
- An input power switch with indicator is standard. List any additional assembly features you would like included - output controls, meters, test points, individual fusing or switches, handles, chassis slides, top/bottom cover screens, etc. (If you require non-stocked components, such as special connectors or circuit breakers, more than 9 days may be required.)
- A distinctive system model number will be assigned, and a firm price will be quoted. Your completely-wired power supply system will be shipped within 9 days.

Or if you prefer...

- You can call Acopian at 1-800-523-9478 and ask for the Power Systems Dept.
- An Acopian Applications Engineer will answer - on the phone - any questions which you may have.

About Acopian

Acopian has been designing and manufacturing power supplies since 1957. Standard models have outputs from 1V to 30kV, and up to 1200W. Each is shipped within 3 days (larger units ship within 9 days) after receiving an order. If no standard model meets your needs, we can customize a model for you, or design a 'special' for your unique requirements. Acopian also manufactures redundant power supplies in three form factors: rack mounting, (some with power supplies that plug in from the front), wall mounting and modular. Redundant power systems come with a full 5-year warranty and are shipped within 9 days.
